

THE REAL DEAL ON

# Climate Change Impacts in New Brunswick

New Brunswick is already experiencing the impacts of climate change and it will get worse.

## Warmer.

- ↑ average temperatures
- ↑ extreme heat above 30°C
- ↑ public health impacts (e.g. heat stress)

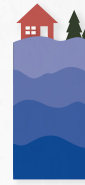

## Wetter.

- ↑ extreme precipitation
- ↑ damage to homes, properties and roads
- ↑ risk of flooding

## Stormier.

- ↑ extreme weather
- ↑ power outages
- ↑ damage to homes, power lines and other infrastructure

## Rising sea levels.

- ↑ 1m for coastal areas by 2100
- ↑ risk of coastal flooding and erosion
- ↑ loss of natural areas such as dunes, beaches, and wetlands

WE MUST ALL ACT ON CLIMATE CHANGE

## Reduce. Prepare. Champion.

# 5

ways you can  
**CHAMPION**  
the need to  
take action

- 1 Educate yourself on the need for climate action and use reliable sources of climate information.
- 2 Get involved in your community's Climate Change Adaptation and Mitigation Plans.
- 3 Reduce your household's carbon footprint and discuss carbon reduction initiatives at your workplace.
- 4 Volunteer for and celebrate climate-friendly initiatives in your community.
- 5 Talk to your friends and family about climate change and build a community of champions.

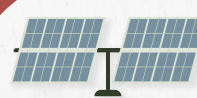

The Government of New Brunswick is leading action on climate change using the Climate Change Action Plan as its roadmap.

Your provincial government is taking action too!

- ✓ Introduction of *Climate Change Act*.

- ✓ Increase in energy from renewable sources.

- ✓ Investments in climate change initiatives through the Environmental Trust Fund and the Climate Change Fund.
