Follow-up till geochemical data for the eastern portion of the McDougall Lake map area (NTS 21 G/07), southwestern New Brunswick

W.F. Gilmore, S. Allard, A.G. Pronk, and S.L.E. Rossiter (xlsx and pdf formats). To purchase this report on CD-ROM refer to page 3 of this notice.

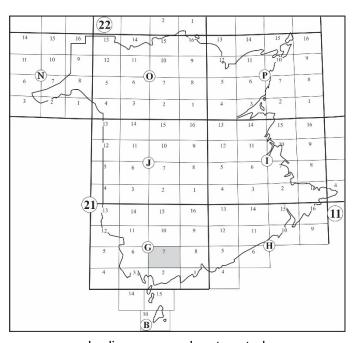

A reconnaissance till geochemistry survey (one site per 4 km²), conducted during the summer field seasons of 2000–2001 by the Geological Surveys Branch (GSB) (Pronk et al, 2002), identified numerous multi-element anomalies in the McDougall Lake region of southwestern New Brunswick. The underlying bedrock in the area comprises Ordovician to Silurian sedimentary and volcanic rocks, which are prospective for tin and tungsten, and various Devonian granites.

In a follow-up till geochemical survey conducted in 2017, GSB collected 274 samples for geochemical analysis within the eastern portion of the McDougall Lake quadrangle (NTS 21 G/07). This survey, which increased the sample density of the area to approximately one site per 1 km2, should help to better define the anomalous areas identified in 2000–2001 and increase the possibility of delineating previously unknown areas of prospective mineralization.

Samples were prepared (dried and sieved) at GSB laboratory facilities (Fredericton, New Brunswick). AGAT Laboratories (Mississauga, Ontario) was contracted to conduct geochemical analysis for 58 elements by ICP-OES/ICP-MS following sodium peroxide fusion digestion. Gold was analyzed by ICP-MS following 3-acid digestion. Additionally, 274 till samples collected in 2000–2001 were sent for re-analysis (same method of analysis as described above).

Two Microsoft Excel files contain the results from the geochemical analyses, site card data, grain size analysis data, and pebble lithology data.

To expedite the publication of these new geochemical data, the results from till pebble lithology analysis are not included with the '2017_21G07_Till_Sample_Data' spreadsheet. These data will be included in a future publication.

ORDERING INFORMATION

Cheques may be drawn payable to the **MINISTER OF FINANCE**.

WE ARE NOW ACCEPTING VISA AND MASTERCARD AT OUR FREDERICTON AND BATHURST OFFICES. PLEASE PROVIDE CARD NUMBER, CARD EXPIRY DATE, AND YOUR TELEPHONE NUMBER.

Copies may be purchased from the New Brunswick Department of Energy and Resource Development:

Room 150, Hugh John Flemming Forestry Centre 1350 Regent Street P.O. Box 6000 Fredericton, New Brunswick E3B 5H1 E-mail: geoscience@gnb.ca

2574 Route 180 South Tetagouche, New Brunswick E2A 7B8

Telephone: (506) 547-2070 Attention: Nicole Hatheway E-mail: nicole.hatheway@gnb.ca

PRE-ORDER FORM

To ensure that your order will be available to you on the release date (September 20, 2018) we must receive this Pre-Order Form by September 13, 2018.
